Publishing Office: European Publishing Corporation Ltd., 84–86 Malahide Road, Coolock, Dublin 5, Republic of Ireland (Phone Dublin 475377; Telex 25670).
Subscription and Advertising Offices: Headington Hill Hall, Oxford OX3 0BW (Phone Oxford 64881: Telex 83177). Bi-monthly, 6 issues per volume.

Annual subscription rates (1983); For libraries, university departments, government laboratories, industrial and other multiple-reader institutions. U.S. $140.00 per annum (including postage and insurance). Two year rate 1983–84 U.S. $266.00. Combined rate: Part A and Part B $$250.00 per annum. Two year combined rate (1983–84): U.S. $475.00. *Specially reduced rates to individuals*: In the interests of maximizing the dissemination of the research results published in this important international journal we have established a two-tier price structure. Any individual whose institution takes out a library subscription, may purchase a second or additional subscription for personal use at much reduced rate of U.S. $45.00. Subscription enquiries from customers in North America should be sent to: Pergamon Press Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, U.S.A., and for the remainder of the world to : Pergamon Press Ltd., Headington Hill Hall, Oxford OX3 0BW, England.

Microform Subscriptions and Back Issues: Back issues of all previously published volumes are available in the regular editions and on microfilm and microfiche. Current subscriptions are available on microfiche simultaneously with the paper edition and on microfilm on completion of the annual index at the end of the subscription year.

It is a condition of publication that manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. However, assignment of copyright is not required from authors who work for organisations which do not permit such assignment. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature and translations. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, electrostatic, magnetic tape, mechanical, photocopying, recording or otherwise, without permission in writing from the copyright holder.

U.S. COPYRIGHT LAW APPLICABLE TO USERS IN THE U.S.A.

The Article Fee Code on the first page of an article in this journal indicates the copyright owner's consent that in the U.S.A. copies may be made for personal or internal use provided the stated fee for copying beyond that permitted by Section 107 or 108 of the United States Copyright Law is paid. The appropriate remittance should be forwarded with a copy of the first page of the article to the Copyright Clearance Centre, Inc., 21 Congress Street, Salem, MA 01970, U.S.A. If a code does not appear copies of the article may be made without charge, provided permission is obtained from the publisher. The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works or for resale. Specific written permission must be obtained from the publisher for such copying. In case of doubt please contact your nearest Pergamon office.

Use of the Index i

Keyword Index 1

Author Index 21

Master List of Books 40

FOREWORD

This comprehensive index of recent books of interest to transportation professionals is a new service of *Transportation Research.* It is unique in several ways.

First, it presents a collection of texts particularly relevant to transportation. Experts have selected and reviewed these books to obtain a focussed list. Persons interested in the field will thus find it much easier to locate references they will want to read and use.

Second, it features a keyword index so that users can quickly find relevant material. This keyword index is an advanced version which uses keywords identified by professionals. It goes beyond the words in the titles of any books—often not especially significant—to words which more specifically reflect the actual content of a book.

To help users decide whether a particular title is really what they want, the bibliographic entries refer to reviews and notices published in *Transportation Research.*

Finally, the index provides all the information necessary for ordering texts directly from the publishers. This should speed the orders and deliveries.

The immediate goal of this index is to make it easier for librarians and readers to find useful, informative books in transportation. There are larger, longer range objectives also. These are to help define the field of transportation, to suggest standards for texts on the topic, and to publicize and disseminate the better offerings.

Comments and suggestions on the presentation and objectives are most welcome. We are just beginning this service and have much to learn. Your help will be most appreciated.

Center for Transportation Studies
Massachusetts Institute of Technology
Cambridge, MA 02139, *U.S.A.*

Richard de Neufville

USE OF THE INDEX

Use of the Keyword Index is simplicity itself. You first search under the keywords of interest to identify titles you might want to examine. The location of complete bibliographic details on each title is indicated by the index number, which points directly to its place in the Master List of Books.

The index number itself is designed to reflect the order in which books were first published in *Transportation Research.* Thus 15:3:39 is a title that was published in Volume 15, Number 3. The Master List of Books is sequenced according to the index number and is, thus, in chronological order.

The author index operates on the same principle as the key word index. You can quickly see if a particular person has written a new book or can identify all the books some individual has published in 1980 and 1981.

The Master List of Books provides a most attractive feature in addition to the detailed bibliographic information and prices. It indicates where any book has been reviewed in *Transportation Research.* This enables potential readers or purchasers to get a better idea of whether a title is suitable to their needs.

KEYWORD INDEX

Accessibility

Transportation, Temporal and Spatial Components of Accessibility 14:1:09

Accessibility : the Rural Challenge 14:2:21

Access For All: Transportation and Urban Growth (reprint of previous edition published by Penguin 1975) 15:3:70

Africa

Fire-Snake : the Railroad that Changed East Africa 15:1:21

Air Traffic Control

How the Air Traffic Control System Works 14:1:23

Aircraft

World Civil Aircraft Since 1945 14:4:10

Incredible Flying Machines 15:2:14

Aviation: The Complete Book of Aircraft and Flight 15:3:08

Helicopter Theory 15:3:35

U S Civil Aircraft Vol 8 15:3:36

The Delta Wing: History and Development 15:3:39

Improving Aircraft Safety 15:3:41

The Road to Kitty Hawk 15:3:43

The Pathfinders 15:3:48

Wings Across the World: Pictorial History of British Airways 15:3:55

Ominous Skies 1935-1939 15:3:56

Airliners 15:3:81

Defence Utility of Commercial Vessels and Aircraft 15:3:83

Aircraft of World War II 15:4:07

Planemakers 15:4:08

Standard Aircraft Handbook 3rd Ed 15:4:16

Farnborough: Story of the Royal Aircraft Establishment 15:4:32

Canada's Flying Heritage 15:5:13

The Illustrated History of Sea Planes and Flying Boats 15:6:03

Observers Book of Aircraft 15:6:26

Gossamer Odyssey: The Triumph of Human-Powered Flight 15:6:28

Introduction to V-STOL Airplanes 15:6:37

Airfreight

The U S Airfreight Industry 14:2:30

Airlines

Service Quality and Market Performance : a Model of Airline Rivalry 14:1:45

Airline Regulation in America : Effects and Imperfections 14:4:19

Financing the Capital Requirements of the U S Airline Industry in the 1980's 14:4:22

An Introduction to Airline Economics 14:4:24

From the Captain to the Colonel : an Informal History of Eastern Airlines 14:4:31

United States Airlines : Trunk and Regional Carriers,Their Operations and Management 14:5:13

Airports

Major Airports of the World 14:1:03

Airports 14:1:17

The Airport Book : from Landing Field to Modern Terminal 14:1:25

Airport Engineering 14:2:01

Airports for the Community : Proceedings of the Sixth World Airports Conference 14:2:08

The Need for a Third London Airport 15:1:17

Possible Sites for a Third London Airport 15:1:18

Airports of the World 15:3:74

International Airport 15:4:04

America

America's Colorful Railroads 14:1:07

The Devil Wagon in God's Country : the Automobile and Social Change in Rural America, 1893-1929 14:1:08

American Transportation Markings : a Study in Communications 14:1:12

On the Eight-O-Two : an Informal History of Commuting by Rail in America 14:1:26

Articulated Steam Locomotives of North America 14:1:34

The Nitrate Clippers : History of Sailing Ships and Trade Along the West Coast of South America 14:1:36

Conquest of the Skies : a History of Commercial Aviation in America 14:1:56

A History of the American Locomotive :Its Development 1830-1880 14:1:61

Americans on the Road : from Autocamp to Motel, 1910-1945 14:2:03

Transportation in America : Users, Carriers, Government 14:2:13

Productivity in U S Railroads 14:2:20

Railways of the U S A 14:2:22

The U S Airfreight Industry 14:2:30

Trade Policy and the U S Automobile Industry 14:2:31

The American Railroad Passenger Car 14:2:36

Truck Drivers in America 14:2:39

The Last American Convertibles 14:4:14

Airline Regulation in America : Effects and Imperfections 14:4:19

Financing the Capital Requirements of the U S Airline Industry in the 1980's 14:4:22

United States Airlines : Trunk and Regional Carriers,Their Operations and Management 14:5:13

Peak Period Supplements : the Contemporary Economics of Urban Bus Transport in the U K and U S A 14:5:23

American Railroads : the Case for Nationalization 14:5:24

National Transportation Policy 15:1:10

Interurbans Without Wires: the Rail Motorcar in the U S 15:1:22

Iowa Takes to the Air, 1845-1918 15:1:29

U S International Aviation Policy 15:1:36

California Central Coast Railways 15:2:12

South Pacific Coast: A Centennial 15:2:16

The American Metropolitan Systems: Present and Future 15:3:06

Development of the U.S. Urban System, Vol. 1: Concepts, Structures, Regional Shifts 15:3:19

Shipbuilding in Colonial America 15:3:26

Norfolk and Western: Giant of Steam 15:3:34

U S Civil Aircraft Vol 8 15:3:36

The Long Haul: Trucking in America 15:3:40

Milwaukee Rails 15:3:52

Urban Growth and City-Systems in the United States 1840-1860 15:3:60

Inside the Penn Central Crisis 15:3:69

Taxation of American Railroads: A Policy Analysis 15:3:76

Transportation: The Domestic System 2nd Ed 15:4:17

Classic American Automobiles 15:4:37

America's Technology Slip 15:5:25

Miles to Go: European and American Transportation Policies 15:6:21

Andes

Railways Across the Andes 15:2:11

Asia

Railways of Asia and the Far East 14:1:41

Atlanta

Automobile Age Atlanta : the Making of a Southern Metropolis, 1900-1935 14:1:50

Australia

Australian Coastal Shipping 14:1:48

Analysis of Urban and Regional Problems in Australia 15:4:30

Automobiles

The Devil Wagon in God's Country : the Automobile and Social Change in Rural America, 1893-1929 14:1:08
Motoring in the Twenties and Thirties 14:1:16
Government, Technology and the Automobile 14:1:24
Man and the Automobile 14:1:30
Automobile Age Atlanta : the Making of a Southern Metropolis, 1900-1935 14:1:50
The World Automotive Industry 14:2:05
Trade Policy and the U S Automobile Industry 14:2:31
The Last American Convertibles 14:4:14
Problems of the Carless 14:4:25

Transportation Research

Aims and Scope of the Journal

Transportation Research, Part A contains papers of general interest in all passenger and freight transportation modes: policy analysis, formulation, and evaluation; planning; interaction with the political, socioeconomic and physical environment; design, management and evaluation of transportation systems. Topics can be approached from any discipline or perspective: economics, engineering, sociology, psychology, etc. (Papers which are strongly mathematical appear in Part B.) Case studies, survey and expository papers are appropriate, and articles are especially welcome which contribute to unification of the field, or to an understanding of the comparative aspects of different systems. The journal is entirely international, and places equal emphasis on the problems of industrialized and non-industrialized regions. Papers which assess the scope for technological innovation within a social or political framework are also suitable for the journal.

The following examples show categories of research within the domain of *Transportation Research, Part A*: Transportation engineering; traffic engineering; urban and regional planning; rational basis for decision making; innovative transportation schemes; analysis of social or economic constraints; studies of noise, pollution and other environmental effects.

Papers dealing with methodological aspects of transportation will be published in the companion journal *Transportation Research, Part B*. Authors may indicate a preference for one Part or the other in their covering letter to the Editor-in-Chief, or by submitting manuscripts to an appropriate Associate Editor. The final decision regarding placement of a manuscript will be made by the editors after the manuscript has been refereed and accepted for publication.

Manuscripts dealing with safety and other public health aspects of transportation can also be submitted to the Editor-in-Chief for consideration by *Accident Analysis and Prevention*.

Allied Journals

Other Pergamon journals which are of interest to readers of *Transportation Research, Part A*:

Accident Analysis and Prevention
Atmospheric Environment
Computers, Environment & Urban Systems
International Journal of Engineering Science
Environment International
Information Processing and Management
Journal of the Operational Research Society
Socio-Economic Planning Sciences
Transportation Research, Part B, Methodological

Each journal has an individual Information and Index Leaflet giving full details. These leaflets can be obtained by writing to the Publisher at the addresses shown inside the front cover of this issue.

Information for Contributors

Manuscripts should be submitted in triplicate to the Editor-in-Chief or to one of the Associate Editors, depending on the subject:

Edward K. Morlok: General theory and policy studies; technological change; the freight modes.

Adib Kanafani: Transportation planning; Air transportation.

Paul Baron: Papers dealing with non-industrialized regions, including social, economic and psychological aspects as well as environmental and policy issues.

Marcus Wigan: Institutional contexts: evaluation, operation and expenditures; methods of impact prediction and assessment.

Frank A. Haight: All subjects.

Only papers not previously published will be accepted, and authors must agree not to publish elsewhere a paper submitted to and accepted by the Journal.

English is the language of the Journal.
Reprints can be purchased on a reprint order form which will accompany proofs.

The original manuscript and diagrams will be discarded 1 month after publication unless the Publisher is requested to return original material to the author.

Both figures and tables will be photo-reproduced, and authors are required to furnish camera-ready artwork or glossy prints. Photocopies or carbon copies are not adequate as they will not reproduce clearly. In case of difficulty please consult the Photoreprographic Unit of your institution.

Preparation of tables

In the interests of economy and in order to avoid the introduction of errors, tables will be reproduced by photo-offset means directly from the author's typed manuscript. This will materially reduce costs of publication and reduce setting delays. Tables should be submitted in a form suitable for direct reproduction. The guidelines detailed below should be followed: (1) Page size should be 8.5 × 11 in. (or 21 × 30 cm). (2) Large or long tables should be typed on continuing sheets. (3) Table headings should be typed on separate sheets but identifying numbers should be placed on the upper right-hand corner of each sheet of tabular material. (4) Original typed tables are required. It will be the author's responsibility to prepare his tables in accordance with this procedure as no facilities exist at the Editorial Office for retyping. In case of difficulty please consult the Photoreprographic Unit of your institution.

Style of Manuscript

Manuscripts should be typed double-spaced on one side of the page only with wide margins, and submitted in triplicate. A short abstract should accompany the manuscript on a separate sheet. Both the paper itself and the abstract should be headed by the name or names of the author and their affiliation. In the case of co-authors, it should be clearly indicated which author is to receive correspondence and proofs for correction.

Mathematical expressions should be carefully inserted, keeping in mind typographical difficulty. Authors should indicate in the margin the names of Greek letters or other unusual symbols when they first occur and clarify any other possible sources of ambiguity: for example, between "zero" and the letter "o", the numeral "one" and the letter "l", capital and small letters, etc. Tables should be submitted on separate sheets of paper, should be numbered consecutively, and should have informative titles. The position of tables in the manuscript should be indicated. All figures and illustrations should be professionally drawn about twice the final size required. Their position in the manuscript should be indicated, and figure numbers together with informative titles should be listed on a separate sheet of paper.

Authors are seriously recommended to use SI (metric) units in their manuscripts, with optional English equivalents in parentheses. If there is a persuasive reason for avoiding SI units, this should be explained in the cover letter submitting the manuscript.

The Harvard System of references is used: in the body of the text a paper is referred to by the author's surname with the year of publication in parentheses and at the end of the paper complete references are given alphabetically by authors' surnames with journals abbreviated according to the *World List of Scientific Periodicals* (4th ed.).

Transportation Research—B

Aims and Scope of the Journal

Transportation Research, Part B contains papers on all methodological aspects of the subject, especially those which require mathematical analysis. Any scientific or technical problem may be treated, which is amenable to quantitative formulation. The general theme of the Series is the development and solution of problems which have a substantial connection with real transportation situations. Purely mathematical exercises, which could relate to any kind of network, are excluded. For example, papers on algorithms must show a relevance to transportation.

The following categories of research are within the coverage of *Transportation Research, Part B*: Demand analysis, whether economic or statistical; Traffic flow models; Design and analysis of transportation networks: Methods of operations planning; Control and scheduling; Optimization in transportation; Queuing theory as it applies to transportation; Traffic assignment and trip distribution; Economic theory.

Non-technical papers will be published in the companion journal *Transportation Research, Part A*. Authors may indicate a preference for one Part or the other in their covering letter to the Editor-in-Chief, or by submitting manuscripts to an appropriate Associate Editor. The final decision regarding placement of a manuscript will be made by the editors after the manuscript has been refereed and accepted for publication.

Manuscripts dealing with safety and other public health aspects of transportation can also be submitted to the Editor-in-Chief for consideration by *Accident Analysis and Prevention*. Such papers will not appear in either *Transportation Research Parts*.

Allied Journals

Other Pergamon journals which are of interest to readers of *Transportation Research, Part B*:

Accident Analysis and Prevention

Transportation Research, Part A General

Each journal has an individual Information and Index Leaflet giving full details. These leaflets can be obtained by writing to the Publisher at the addresses shown inside the front cover of this issue.

Information for Contributors

Manuscripts should be submitted in triplicate to the Editor-in-Chief or to one of the Associate Editors, depending on the subject:

George H. Weiss: Mathematical, statistical or experimental aspects of traffic flow and traffic control.

Alan G. Wilson: Trip distribution, modal choice and related travel demand models.

Carlos Daganzo: Transportation network analysis; statistical aspects of demand models.

Marc Gaudry: Economic and econometric models; cost-benefit analysis.

Frank A. Haight: All subjects.

Only papers not previously published will be accepted, and authors must agree not to publish elsewhere a paper submitted to and accepted by the Journal.
